

Four Rivers[®]
SOFTWARE SYSTEMS

Highlights

Our Location

Incorporated in the state of Pennsylvania in 1990, Four Rivers Software Systems, Inc. is headquartered in Forest Hills, a suburb of Pittsburgh, Pennsylvania.

Our Staff

Our diverse staff members are experts in the fields of maintenance, healthcare, software development, and networking. A full third of our staff is dedicated to customer service while another third is focused on product development.

Our Name

Pittsburgh is traditionally known for its three rivers: The Allegheny, the Monongahela, and the Ohio Rivers. At the very junction of the rivers is a fountain, The Point. It was built to symbolize the meeting of the waters and the rivers' part in the settlement and economic growth of America's heartland.

The water in the fountain comes not from one of the "Three Rivers", but from a little known and unnamed fourth river. The fountain source is a subterranean river about 54 feet below the surface at "The Point". Today it flows south from beneath the Great Lakes and under Western Pennsylvania.

TMS WorkGroup[®]

Hardware & Software Requirements

TMS WorkGroup Server

TMS WorkGroup is a scalable solution and the minimum hardware and software requirements vary. We created two scenarios to help you estimate your hardware and software needs.

Scenario 1

Segments: less than or equal to three user segments
Users: less than or equal to 50 core users
Assets: less than or equal to 15,000 assets
DB Size: less than 2 GB

Hardware

Processor: Dual Pentium, 3 GHz (or equivalent)
RAM: 2 GB
HDD: 60 GB (minimum)

Software

OS: Windows Server 2008 (32 and 64-bit), Windows Server 2003 32-bit* RC2 SP2, Windows XP Professional, Windows Vista Business, Windows Vista Ultimate, Windows 7 Professional, Windows 7 Ultimate with current service packs.
SQL Server: SQL Server 2000 SP4 or SQL Server 2005 SP2
 SQL Server 2005 Express
Web Server: Internet Information Services (IIS) 6.0 or higher .NET Framework 2.0
 Administrator rights are required to perform the installation

Scenario 2

Segments: greater than or equal to four user segments
Users: greater than or equal to 50 core users
Assets: greater than or equal to 15,000 assets
DB Size: greater than 2 GB

Hardware

Processor: Dual Pentium, 3 GHz (or equivalent)
RAM: 4 GB
HDD: 60 GB (minimum)

Software

OS: Windows Server 2003 32-bit* RC2 SP2, Windows XP Professional, Windows Vista Business, Windows Vista Ultimate with current service packs.
SQL Server: SQL Server 2000 SP4 or SQL Server 2005 SP2
Web Server: Internet Information Services (IIS) 6.0
 .NET Framework 2.0
 Administrator rights are required to perform the

TMS WorkGroup Workstation Requirements

TMS WorkGroup Workstation Requirements

Hardware

Processor: Pentium, 2 GHz (or equivalent)
RAM: 512 MB minimum, 1 GB recommended

Software

OS: Windows XP Professional, Windows Vista Business, Windows Vista Ultimate, Windows 7 Professional, Windows 7 Ultimate with current service packs.
Optional: Adobe Acrobat Reader 8.0
Microsoft Excel

Items Specifically Not Supported

Windows 95
Windows 98
Windows ME
Windows NT 4.0
All version of Crystal Reports
Any versions of Windows emulation software for Apple, Unix, or Linus computers
TMS WorkGroup operated via remote environments like Novell Application Launcher (NAL) and Citrix
Microsoft Windows SharePoint
TMS WorkGroup operated across a wide area network as this is a local area network solution.

Important Notes

TMS Product Family is developed for the English (United States) version of Microsoft Windows.

Virtualization is supported provided that images match current hardware and software minimum requirements.

TMS WorkGroup requires TMS Control Panel if email capabilities, Auto PM Generation, and Document Upload are used.

TMS Control Panel is normally installed on the TMS WorkGroup Web server; however, it can be installed on a separate server.

*The TMS Database is compatible to operate in a 64-bit operating system, but the application (web code) must be operating under a 32-bit operating system.

Disclaimer

Minimum hardware and software requirements are subject to change at any time. Please consult with FRSoft technical support about changes to the hardware and software requirements.
