

Four Rivers[®]
SOFTWARE SYSTEMS

Highlights

Our Location

Incorporated in the state of Pennsylvania in 1990, Four Rivers Software Systems, Inc. is headquartered in Forest Hills, a suburb of Pittsburgh, Pennsylvania.

Our Staff

Our diverse staff members are experts in the fields of maintenance, healthcare, software development, and networking. A full third of our staff is dedicated to customer service while another third is focused on product development.

Our Name

Pittsburgh is traditionally known for its three rivers: The Allegheny, the Monongahela, and the Ohio Rivers. At the very junction of the rivers is a fountain, The Point. It was built to symbolize the meeting of the waters and the rivers' part in the settlement and economic growth of America's heartland.

The water in the fountain comes not from one of the "Three Rivers", but from a little known and unnamed fourth river. The fountain source is a subterranean river about 54 feet below the surface at "The Point". Today it flows south from beneath the Great Lakes and under Western Pennsylvania.

Corporate Overview

Making It Easy

Four Rivers Software Systems, Inc. is focused on delivering comprehensive maintenance management software (EAM/CMMS) solutions to the healthcare industry. Serving healthcare plant and facilities and clinical engineering, as well as ISOs, we provide powerful tools to increase productivity and profitability. By listening to our customers and continually updating and improving our products and services, Four Rivers has established itself as the leading choice for healthcare professionals.

We have successfully implemented the TMS[®] (Total Maintenance System) Family of Products in over 1,700 facilities nationwide. TMS uses the latest .NET and true Web-based technologies, and is relied upon by many thousands of users daily. Capitalizing on our 100% in-house development team and technology advancements, the TMS product line includes: TMS Professional, TMS Enterprise, TMS WorkGroup, and a full suite of Mobile Solutions and optional modules.

The TMS Family of Products includes a number of customizable features. Electronic interfaces, as well as a variety of add-on modules provide software solutions and services that accommodate the needs of your current operation and those in your future.

Four Rivers also offers a complete suite of services to ensure your initial and on-going success with TMS. The cornerstone of our services lie in our team's over 200 years of combined experience and the online Customer Care Center, delivering immediate training and assistance. Our services range from pre-conversion consulting, project management, implementation, unequalled data conversion, data entry, startup and follow-up training, and support services. The combined impact of product and services create a highly successful CMMS/EAM system.

So relax... TMS is working for you.
